## Overview

### Bioethics in the Capital

From its foundations to its applications in practice, the role of ethics has never been greater. Health professionals must include aspects of bioethics in any commitment to continuing education and lifelong learning. This includes issues and topics as varied as end-of-life care, state DNA banks, child advocacy and professional practice.

### Course Objectives

#### Upon completion of this program participants will

- Have a better understanding of the role and importance of bioethics in clinical and institutional decision making.
- Be better able to identify ethical challenges and issues in clinical practice, health law, end-of-life care, the role of institutional ethics committees, and other areas.
- Be better able to articulate ethically optimized solutions in clinical and social contexts.

### Audience

This course is designed for nurses, physicians, social workers, lawyers, clergy, psychologists, health administrators, philosophers and others with an interest or a need for continuing education in health ethics.
